The 1955 Economic Plan calls for an output of 90,000 tons of rolled products from nonferrous metals from nationalized industry. Private industry is to produce 302 tons. The quarterly plans amount to one fourth of the yearly total - 22,500 tons for nationalized industry and 75.5 tons for private industry per quarter. These plan figures include only P1 production. The output of P2 production is set at approximately 80 tons monthly and P3 production at 220 tons monthly.
